Summary

I'm a software engineer based in West Palm Beach, FL. Currently, I'm a senior software engineer in the Strategy team at Storj Labs. I'm also the co-creator of [Campion](#), an edge-based serverless middleware for implementing circuit-breaking functionality for distributed services. Previously, I founded BooklyBox, which was successfully acquired by Quarterly.

Skills

Backend

Go, C, Node.js, Express, Ruby, Rails, Sinatra, Solidity, PostgreSQL, SQL, Redis, MongoDB, DynamoDB, Lambda, Serverless

Frontend

JavaScript (ES6), React/Redux, Vue, HTML/CSS, TailwindCSS, jQuery

Tooling

Git/GitHub, Docker, Linux

Cloud

AWS, Cloudflare, Digital Ocean, Heroku

Professional Experience

02/2021 – present

Remote, USA

Senior Software Engineer, Storj Labs

- Co-created the Storj file browser built on top of the Storj network, allowing users to search, store, and operate on their files stored on the decentralized object storage network, which led to an increase in user engagement by 20%+
- Helped engineer a new user onboarding flow from sign-up to object storage
- Wrote extensive Go end-to-end tests for web apps

08/2020 – 02/2021

Remote, USA

Co-Creator, Software Engineer, [Campion](#) — [campion-breaker.github.io](#)

- Co-created [Campion](#), an edge-based serverless middleware for implementing circuit-breaking functionality for synchronously called distributed services
- Built [Campion](#) to work on AWS (IAM, CloudFront, Lambda, and DynamoDB) and Cloudflare (Workers and Workers KV) with a single CLI command
- Designed [Campion](#) to work with all HTTP methods and to forward any incoming and outgoing headers and body
- Resolved race conditions when incrementing failure/success counts by appending new entries to databases with unique time-based keys
- Load tested [Campion](#) by using [artillery.io](#) to simulate 5,000+ concurrent requests
- Built easy-to-use CLI that abstracts away complex deployment logic and a beautiful dashboard for users to track their metrics with Node.js, Express, React, and Redux
- Collaborated daily with a fully remote team of engineers
- Co-authored [Campion's](#) case study: <https://campion-breaker.github.io>

2019 – 2020

Remote, USA

Software Engineer, Self Employed

- Dayllo: Trello-like app with React/Redux front-end and Ruby on Rails REST API backend
- Airline Routes: an interactive SVG map for viewing and filtering airline routes built with React and bootstrapped with Create React App
- Team Tickets: Ticket tracking app written in Ruby/Rails 6, PostgreSQL, deployed on Heroku

2017 – 2018

Santa Monica, USA

Co-Founder, Growth Director, [PageHabit](#) (Quarterly Subsidiary)

- Led the growth team and grew our online book community to over 50,000 active members
- Created the influencer program and the wildly popular PH contests to drive sustainable growth

2015 – 2017
Boston, USA

Founder, BooklyBox

- Founded BooklyBox, a monthly book membership with a thriving online community consisting of thousands of members
- Led a team of four employees and 15 moderators for our online community
- Acquired by Quarterly  in May of 2017

Education

2015 – 2017
Amherst, USA

Finance, Isenberg School of Management, UMass Amherst
